## OPTi® Food & Beverage

PORTABLE REFRACTOMETERS FOR QUALITY CONTROL + MEASUREMENTS ON-THE-GO

### The pocket-sized refractometer for food & beverage

OPTi digital handheld refractometers are ideal for food & beverage applications thanks to their durable, IP65 pocket-sized design, quick 2 second read time and broad selection of scales. Used for concentration measurement and control, the OPTi is great for testing the ripeness of fresh fruits such as grapes and tomatoes simply by squeezing a small amount of juice directly onto the refractometer prism. They are used in the manufacturing of jam, marmalade, syrup and other high sugar content products as well as for testing finished juices and other soft drinks.

### OPTi® Digital Handheld Refractometers

- Quick 2 second read time.
- Onboard library of over 40 scales.
- 3 active scales on a single device.
- High Ambient Light (HAL) detection warns of too much light entering the sensor.
- Clear digital LCD display.
- Unique "AG Test Mode" that allows the use of long-life non sucrose based certified reference materials.
- Durable IP65 pocket sized design.
- Programmable read delay for sample temperature stabilisation.
