

RFM900-T Series Refractometers

WIDE MEASURING RANGE WITH TOUCHSCREEN AND PELTIER TEMPERATURE CONTROL
FOR FLAVOURS, PHARMACEUTICAL, CHEMICAL, PETROCHEMICAL & RESEARCH USE

Bellingham + Stanley has been manufacturing refractometers for over a Century and the latest refractometers build on that legacy.

Featuring a wide measuring range up to 1.70 RI and capable of measuring to six decimal places, the RFM900-T Series refractometers are ideally suited for use in the chemical, petrochemical, pharmaceutical, flavours and fragrance industries as well as for academic research.

The instrument's new ABS case is ergonomically designed so that any spills are dealt with by its sloping shape or by the PEEK spill barrier that surrounds the shallow, easy-clean stainless steel prism dish. The prism dish is shaped to hold sufficient sample for measurement whilst retaining a large enough surface area for rapid temperature stabilisation. A Kalrez® gasket has been chosen as the prism seal due to its impermeable nature to most chemicals.

Inherent to the new design is the new high definition, capacitive touchscreen display that not only facilitates operation in factory environments, even when operating whilst wearing gloves, but also is the centrepiece of the new software that helps the operator quickly manoeuvre through the user and configuration menus. On-screen graphical prompts also support simple operation such as Method loading, calibration and routine maintenance.

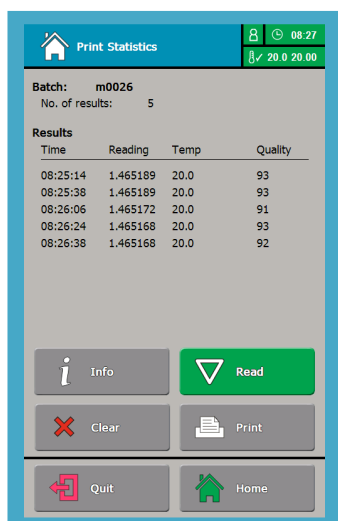

SMART temperature stability, RFID user clearance and application specific pre-programmed Methods simplify routine analyses within pharmaceutical and petrochemical industries. Supplied PC software facilitates control via Ethernet connection so that technical support and training may be performed remotely.
