

SEPARATION

THE NEW ANDRITZ DECANTER WILL BRING THE BEST PERFORMANCE FOR YOU

DECIDE FOR OUR ANDRITZ DECANTER CENTRIFUGE DU NOW

ANDRITZ has developed a new generation of decanter centrifuge, bringing you better results than any decanter before: the ANDRITZ decanter centrifuge DU.

As a global separation specialist, ANDRITZ has taken a new

development step in decanter centrifuges that focuses on performance and benefits for the users in the municipal wastewater market:

- High solids dryness
- High capacity
- Low polymer consumption
- Low energy consumption

At ANDRITZ, we concentrate on the needs and benefits for our customers with this new decanter.

Take the opportunity to witness the outstanding benefits in your plant and with your product.

ANDRITZ

ENGINEERED SUCCESS

Be the first to evaluate all the benefits the ANDRITZ decanter centrifuge DU can bring to your daily business

MAIN BENEFITS

- **Low polymer consumption:** Still with the target of improved operating economy, polymer consumption is a key factor in reducing total cost of ownership. In operation, the ANDRITZ decanter centrifuge DU requires up to 1 kg/TDS less polymer dosage, which results in lower expenses for consumables and allows the polymer dosage to be optimized independently of the decanter operating parameters.
- **High dryness:** At ANDRITZ, we know that it is essential to obtain the highest possible solids dryness. With the ANDRITZ decanter centrifuge DU, you can expect up to 1% higher dryness than from a conventional decanter.
- **High capacity:** The ANDRITZ decanter centrifuge DU provides up to 20% higher capacity, which will enable you to increase your plant capacity without changing the machine footprint.
- **Low energy consumption:** Energy consumption is a key element in the process of waste water treatment. In terms of cost cutting, it is important to ally treatment efficiency with reduced energy consumption. With the ANDRITZ decanter centrifuge DU, save up to 50% more than a traditional decanter centrifuge.
